SUMMARY

AI-focused Product Designer with 5+ years of experience delivering end-to-end digital product experiences across healthcare technology and fintech education. At UnitedHealth Group, designs AI-native member and provider interfaces that reduce friction in care access and prior authorization workflows, contributing to a 42% increase in digital engagement over two years. Proven record of translating complex, data-intensive workflows into intuitive, WCAG-compliant products that measurably improve task completion rates and reduce support escalations.

EXPERIENCE

UnitedHealth Group | AI Product Designer Aug 2025 – Present

- Designed conversational AI interfaces for UHG's member-facing chat assistant, enabling real-time provider search, appointment scheduling, and lab result access; helped drive **80%+ digital self-service adoption** across consumer contacts.
- Developed UX flows for AI-powered prior authorization submissions within Digital Auth Complete, contributing to a **96% first-submission approval rate** by reducing form ambiguity and improving data-capture design.
- Prototyped and iterated on United AI Studio's internal model-management dashboard using **Figma AI and Midjourney** for rapid asset generation; reduced design-to-dev handoff cycles by 30%.
- Applied **prompt engineering with ChatGPT and Claude** to accelerate user research synthesis, cutting research-to-insight turnaround from 5 days to 2 days across 4 product squads.
- Redesigned Optum Health's AI-enabled scheduling interface using **Galileo AI** for auto-layout generation; shipped 3 major redesign sprints 20% ahead of roadmap.
- Defined accessibility and interaction standards for AI-generated UI components within UHG's enterprise design system, ensuring WCAG 2.1 AA compliance across 12 product surfaces.
- Collaborated with data science and engineering teams to translate ML model outputs into explainable UI patterns for clinicians flagging disease risks, improving clinician trust scores by 18 points on internal feedback surveys.

Vivma Software Inc. | Senior Product Designer Sep 2021 – Aug 2023

- Owned end-to-end product design for Finlatics' simulated portfolio management platform, supporting **500+ active learners** across equity research, investment banking, and financial markets programs.
- Redesigned the learner onboarding flow using **Figma** and **Maze** for usability testing; reduced drop-off at account setup by 34% and increased program completion rates to 6x the industry average.
- Built and maintained a scalable component library in Figma covering 60+ UI components for web and mobile-responsive views, cutting designer ramp-up time by 40% for new team members.
- Designed interactive data dashboards for real-time BSE 500 portfolio simulation, collaborating with engineers to define chart interaction patterns and tooltip behaviour's using **Zeplin** for spec delivery.
- Conducted 25+ moderated user research sessions with students and college partners; synthesized findings using **Dovetail** and translated insights into 3 major product pivots that expanded institutional B2B partnerships.
- Led mobile-first redesign of program content pages using **Adobe XD**; improved session duration by 28% and reduced bounce rate by 21% within 90 days of launch.

Adons Softech | UI/UX Designer May 2019 – Aug 2021

- Designed responsive web interfaces for 6 early-stage startups across e-commerce and SaaS verticals, delivering wireframes, high-fidelity prototypes, and dev-ready assets in **Sketch** and **InVision**.
- Created user journey maps and IA sitemaps for a B2B SaaS client, reducing navigation depth from 4 clicks to 2 for core workflows, improving task completion rate by 31% in usability testing.
- Executed brand identity and icon sets for 3 clients, delivering full style guides covering typography, color systems, spacing tokens, and component usage rules.

EDUCATION

Northeastern University, Boston, MA | M.S., Information Systems Sep 2023 – Dec 2025

Jawaharlal Nehru Technological University, Hyderabad | B.Tech, Computer Science Jul 2018 – Aug 2022

SKILLS

Product Design: User Research, Information Architecture, Interaction Design, Usability Testing, Wireframing, Prototyping, Design Systems, WCAG 2.1 Accessibility
Design Tools: Figma, Figma AI, Adobe XD, Sketch, InVision, Zeplin, Maze, Dovetail, Miro, Principle
AI & Automation: Prompt Engineering (ChatGPT, Claude, Gemini), Galileo AI, Midjourney, DALL-E, Uizard, Zapier AI
Research Methods: Moderated Usability Testing, A/B Testing, Heuristic Evaluation, Card Sorting, Jobs-to-be-Done, Affinity Mapping
Collaboration & Dev Handoff: Jira, Confluence, Notion, Zeplin, GitHub (design branches), Agile/Scrum, Design Sprints
Data & Analytics: Amplitude, Google Analytics, Hotjar, Mixpanel, AI-augmented insight synthesis
